

Notice to all United States Citizens

Debt Invoice

Your immediate attention is required

The President has requested that all United States ("legal") Citizens please fill out and submit this form, with payment, by December 31, 2012, or before he leaves office.

National Debt:

The National Debt is almost \$16 trillion dollars. There are 300 million people in the United States. Therefore, every citizen owes \$53,333. Please follow the instructions below:

- 1 Number of individuals in your Household: see instructions
- 2 Multiply the number on line 1 times \$53,333 = \$

{ Example: A family of 4 would owe \$213,333. }

Social Security Insolvency:

If the amount on line 3 is still a burden, then the President has asked that we at least pay for the \$4.4 trillion dollars needed to help the Social Security problem.

Therefore, \$4.4 trillion divided by 300 million = \$14,667 per person.

- 3 Take the number in line 1 & multiply it by \$14,667 =

{ Example: A family of 4 would owe \$58,667. }

Iraq War:

If the amount in line 2 is not possible to pay, then we ask that you at least help us with the cost of the Iraq War, which is around \$1.2 Trillion and counting. Military experts say that a small force will remain in Iraq and a larger one in Afghanistan cost of \$120 billion per year, this will add another \$600 billion dollars of debt.

However, lets just use \$1.2 Trillion divided by 300 million people = \$4,000 per person.

- 4 Take the number in line 1 & multiply it by \$4,000 = \$

{ Example: A family of 4 would owe \$16,000. }

Please be advised that these numbers are constantly growing, so your prompt attention is required. Make all checks payable to the "United States Treasury". Please be advised that this debt invoice is in ADDITION to your income taxes and FICA taxes already paid (employer & employee).

"Your Prompt and Immediate Payment Would be Greatly Appreciated"
